DETAILED ACTION

Election/Restrictions

Claims 17-20, which were cancelled, are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected 5, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Specification

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: claim 7 concerns the use of tocol in the claimed product and no reference to that was found in the specification.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1761

Claim 8 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for a plant extract of the claimed product, does not reasonably provide enablement for the product to be synthetically produced. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to the invention commensurate in scope with these claims. The specification recites that the “bioactive compounds may be isolated, purified to homogeneity, and the structure be elucidated. Consequently, it should be appreciated that the contemplated bioactive compounds may be entirely (*de novo*) or partially synthesized/modified *in vitro*.” Applicant places an undue burden on those of ordinary skill in the art so that they would be able to synthesize the claimed composition.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the scope of the phrase “thaumatin-like proteins” is unknown.

Claims 9 and 16 are indefinite because the scope of the term “about” is unknown.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1761

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by barley wort in light of Fox (USPN 5,725,901).

Applicant claims products that are disclosed to be obtainable by extracting barley with water, which is a brewer's wort (generally used in making beer). Many of the claims recite process limitation concerning how the product is produced but these are given no patentable weight because these process steps would inherently produce products that are found in brewer's wort.

With regard to claim 7 and the presence of a tocol, wort inherently contains a tocol, as evidenced by Fox, see col. 2, line 66 to col. 3, line 3.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Cvetkovic *et al.* (J. Inst. Brew., May-June, 1997, Vol. 103, pp. 183-86) teaches the effects of some thaumatin like proteins on brewers yeast.
